

Field Technician (Electrician)

Exciting opportunities are currently open for Field Technicians (Electrician) to learn and develop their skills.

Positions are open in the following locations:

- Victoria
- New South Wales

This role will see you working in locations remote from base in the field, primarily in the base state and nationally, for extended periods of time.

As a Services Technician, you will be responsible for performing:

- Technical services for assembly, test, repair, monitoring and maintenance of power and distribution transformers.
- Works locally, nationally and internationally.
- Works in a safe, efficient and cost-effective manner according to internal procedures and customer requirements.

The successful candidate will have:

- A VIC /NSW Class electrical license
- Knowledge and experience relating to power and/or distribution transformers would be an advantage.
- Excellent team skills and be a willing team contributor
- A strong work ethic with the ability to work autonomously and the stamina to see projects through to completion.

The Field Services Department has a comprehensive skills and competency programme for career and skills progression for employees.

If you wish to be considered for the role, please forward your CV to Cindy Prasad cindy.prasad@wtc.com.au
