

Job Vacancy

Quality Control Officer

Full-Time position

· Glen Waverly, Victoria, Australia

Wilson Transformer Company is an Australian owned engineering and manufacturing company, specialising in the production of power and distribution transformers. Wilson Transformer prides itself with enviable international reputation for quality, reliability and service.

This is an excellent opportunity to join as a Quality Control Officer with Wilson Transformer Company. This position will be responsible for controlling the Quality of raw materials, components, assemblies, and finished products with the Power Transformer Business Unit.

The major responsibilities of this position:

- Ensuring materials, components, assemblies, and finished products are inspected and tested in accordance to requirements
- Monitoring and assessing the risk of non-conformances and escalating issues according to treatment authority
- Ensuring appropriate action is taken to rectify and prevent defects for all non-conformances
- Conducting quality gate reviews to prevent non-conforming components, assemblies and finished product from progressing to the next lifecycle stage and managing their outcomes
- Conducting inspections of outsourced product
- Conducting investigations and managing their outcomes
- Identifying product non-conformance and raising appropriate actions
- Conducting root cause analysis to determine the cause of defects and documenting outcomes
- Maintaining material data records including certificates for traceability
- Implementing quality improvement initiatives
- Communicating and consulting with all stakeholders for the resolution of the Quality issues
- Managing stock loggers, analyzing data and report writing

BUILT SMART

FOR LIFE
