

Job Vacancy

Transformer Test Technician

An opportunity presents itself for an additional test technician in the Test Department. This is a hands-on role to ensure products tested and delivered according to production schedule requirements on time and to high quality standards.

Reporting to the Test Manager your key responsibilities will include but not limited to:

- Accurately and efficiently test transformers to relevant AS / IEC standards. This includes High Voltage testing and functional testing & fault finding of Transformer controls.
- Possess sufficient and proven in depth knowledge to work in a HV Test environment
- Comply with Policies, Procedures and Work Instructions
- Communicate effectively with team members and customers
- Work effectively and efficiently in a high risk environment
- A proven track record of commitment and ability to perform overtime when required
- Assist with hazard identification and risk control to safety, the environment, product and assets

The successful candidate will have:

Essential -

- Electrical trade certificate or higher qualification with a minimum of 3 years hands on experience in Electrical industry
- Must be able to read and understand technical drawings.
- Strong mechanical and electrical aptitude.
- Will be enthusiastic, adaptable and willing to learn
- Capacity to fulfil the physical requirements of the role including but not limited to lifting and working at heights
- Be a good team player.
- Must be able to work on afternoon shift.

Desirable -

- Proven hands on experience in testing control systems

If you wish to be considered for this role please contact Cindy Prasad, cindy.prasad@wtc.com.au.
