

Technical Seminar

Transformer Design, Condition Monitoring & Life Management

13 September 2016,
Grand Papua Hotel, Port Moresby, PNG

The Seminar is jointly organised by Wilson Transformer Company, Port Moresby Electrical Co (PME), Dynamic Ratings, TJ | H2b Analytical Services and Sergi Transformer Protector.

- LEARN** about all aspects of power transformers, from specification and design, to manufacturing, maintenance, diagnostic testing and end of life assessment.
- LISTEN** to real-life case studies with practical solutions from a leading manufacturer of power transformers, as well as specialists of the condition-based maintenance solutions.
- USE** methods and tools presented to better manage your assets.

Learning Opportunities for all:

Electrical engineers (in utilities, mining, oil & gas companies), engineering graduates, project and asset managers, maintenance technicians and managers, procurements specialists.

Do not miss the opportunity to register for this Technical Seminar! Space is limited!
