

Wilson Transformer Company recertified to ISO 9001:2015, ISO 14001:2015 and AS/NZS 4801:2001 standards

Melbourne, Australia – 04 May, 2016. Wilson Transformer Company is pleased to announce that we have recently been recertified as compliant to:

ISO 9001:2015, ISO 14001:2015 and AS/NZS 4801:2001

ISO 9001:2015 – a revised version of ISO 9001:2008 that sets out the requirements of a *Quality Management System*. It addresses various aspects of quality management, such as customer satisfaction, risk management, leadership, operational effectiveness and continual improvement.

ISO 14001:2015 – a revised version of ISO 14001:2004 that sets out the requirements of an *Environmental Management System*. It requires that an organisation manages all its environmental issues, including all kinds of waste, pollution, contamination, in a holistic way.

AS/NZS 4801:2001 – a standard that sets out the requirements of an *Occupational Health & Safety Management System*. It assists an organisation in creating a safe workplace and improving its OHS performance.

Organisations were granted a three-year transition period after the revision had been published in September 2015 to recertify to the revised versions of ISO 9001:2015 and ISO 14001:2015. We are very proud that we were able to demonstrate the compliance with the latest standards in this early stage of the transition.

The scope of ISO 9001:2015, ISO 14001:2015 and AS/NZS 4801:2001 certification includes the sales, design, procurement, manufacture, factory acceptance testing, delivery, site assembly and life management services of power transformers, distribution transformers, compact MV substations, special transformers and special applications.

The certification is valid until 2019.

Our products and solutions have an enviable reputation for quality, reliability and safety. We will continue best business practices in order to better satisfy the requirements and expectations of our interested parties and improve our overall performance.

Ed Wilson

Managing Director
